# WZATCO

YUVA PLUS ANDROID

Note: As the product system is updated from time to time, the specific operation content is based on the actual situation.

Contents

Important Safeguards

1. Please read the manual carefully before operating projector. To ensure stable power supply, please use standard power cord.

2. Please use the power supply and cable indicated on the rating label. The projector should be kept away from cloths, sofas and anything that may block the ventilation scoop. Please keep the unit away from flammable and explosive materials.

3. Please do not disassemble the unit by yourself as this will invalidate the warranty service. To protect your eyes, do not stare directly at the lens when the projector is on. The projector must be kept away from water and any other liquids.

4. To prevent electric shock, please keep the projector out of the rain and away from moisture. It is recommended to switch off the projector after it has run for 6 hours non-stop. Please use the original foam and other cushioning materials when transporting the projector.

5. If the projector does not work, please contact the authorized service agent.

Switching Machine Operation

Power On:

Step1: Press the power button on the body or the power button on the remote control, the indicator light will turn blue and steady.

Step2: After 2 seconds, the projector starts to start, the image appears on the screen, and the unit enters the normal working state.
Step3: If the projector is newly installed, the image may be blurred or trapezoidal distortion when it is turned on for the first time. Please refer to the "Focus/Keystone Correction" section for calibration.

Step4: After the image is adjusted clearly, it can be viewed normally.

Power Off:

Step1: In the working state, press the power button of the body or the power button on the remote control to switch the projector to the standby state.
Step2: After the projector enters into the standby state, the machine is in the process of automatic heat dissipation, and the indicator light will change from blue to red.

Power Key

⚠️

Please connect the power cord to the projector before connecting the power cord to an electrical outlet.

Focus / Keystone Correction

Focusing

Keystone Correction

Image Focusing

Place the projector lens perpendicularly to the projection screen or curtain wall, and adjust the focus dial until the image is clear, that means the image focusing is finished.

During the focusing process, you can play the programs or pick up the product menu images to match the focusing adjustment.

Keystone Correction

Please turn the trapezoidal adjustment dial until the image is displayed normally.

Note: The projector has only mechanical trapezoidal correction in the vertical direction and there is no horizontal correction. Make sure the projector is level with the projected image.
⊗   ⊗   ✓

Standard Setting

Refer to the data in the table below to place the projector away from the projection screen according to the preset graphic size. When installing, place the projector on a solid, stable countertop . The airframe should be well ventilated. Do not cover or block the vents. There should be no obstructions within 30cm of the vents.

Aspect Ratio	16:9
Picture Size（inch）	Projection Distance（m）
50	1.54
70	2.15
100	3.08
120	3.69

Note: The above data is for reference only, please refer to the physical measurement.
